

Description

The GR 40 E, a very flexible vertical electric grill with many possibilities of use !

The **vertical electric grill** GR 40 E can **cook or reheat** a spit of **15-kg-kebab or gyros meat** thanks to **3 Incoloy heating elements**. Each **heating element** can be **individually regulated** in full or half power. The **firestones** placed behind the heating element **accumulate and restore the heat** on the meat to be cooked.

For **even cooking**, the back and the **heating sources** of the grill gyros are **adjustable** according to the volume of the "carrot of meat" or spit of meat.

This **vertical electric grill** is equipped with **a-400-mm-high spit**. This rotating spindle placed in front of the heating source of the **gyros grill** can support up to **15 kg of beef, lamb or poultry**.

A wide choice of accessories allows you to customize your **gyros or kebab electric grill** GR 40 E :

- A set of **12 barbecue skewers** (BG 4) to grill **shashliks, meat skewers or fish**.
- The **kebab knife** to cut the meat easily and to calibrate the pieces of meat.

- **Stainless steel side reflectors** to concentrate the heat on the spit of meat
- **Stainless steel protection** to recover excess of meat juice and cut meat.
- The **meat shovel** to make **portions of gyros or kebab meat**.

The highly functional and ergonomic design of the kebab grill GR 40 E makes you forget the tedious use and cleaning of a classic vertical grill!

The **kebab grill** GR 40 E is equipped with a **fully hermetic spit holder**. The motor placed at the bottom part is thus **protected from any infiltration of fat or gravy**. **Mounted on stainless steel ball bearings**, the motor does not support the weight of the meat or the jerks by cutting the meat. It remains **protected from any twisting**.

The **meat spit** is put in place **very easily**, with one hand, on the **hermetic support**. This **vertical spindle** is equipped with a **pin** to be removed in case of failure to **keep using the grill kebab by manual rotation**.

The **kebab grill** GR 40 E is **easy to clean** thanks to the large inclined and stamped bottom that collects pressed juice into a **fully removable drawer**.

Features: on / off switch, 400-mm-high spit, 3 Incoloy heating elements, pilot lights. Supplied without the accessory.

Technical characteristics

Capacity	15 kg
Power	3.6 kW
